

Dear Dr. Newton,

I am writing to express my interest in the Masters of Cybersecurity program at Argodillo University. Currently, I am a Senior at the University of West Florida in Pensacola, Florida, where I am a double major in Cybersecurity and Software Design and Development and a double minor in Honors and Computer Science with a 3.4 overall GPA. I am a full-time student, and my academic coursework and extracurricular activities in the Collegiate Cyber Defense Competition and the Collegiate Penetration Testing Competition through the Cyber Club and being a Cyber Ambassador at UWF, I feel make me an ideal candidate for a spot in your Masters of Cybersecurity program.

My previous experiences have prepared me for the Masters of Cybersecurity you have at Argodillo University. I have completed an internship with Electronic Arts, where I helped launch a new program for linking user data to their gamertag that the company will use across its many titles in the future, and with the Department of Defense, where I worked on mission-critical cyber-related problems. In both internships, I not only got to improve my technical skills, but I also learned the real-world skills of adaptability to problems, communication with peers and superiors, and problem-solving skills that you do not learn in the classroom. Working through the coursework offered for the Masters of Cybersecurity program at Argodillo University would benefit me greatly, and at the same time, my education and experience so far in the field will allow me to be a value to you as well.

Our world today is full of threats, one of the biggest is online threats to just about everything. Daily, you hear about cyber threats against businesses, cities, people, and of course, our nation itself. I am excited about the career I am pursuing. Every day, I see the pain caused by the cyber-attacks that occur in the United States as well as globally. I believe it is a job for those in the cybersecurity field to try to end some of that pain, and my goal is to be a part of that effort. Pursuing a Masters in Cybersecurity at Argodillo University with a concentration in either National Security or Software and System Security would put me on my way to this goal.

Below is a link to my online portfolio, detailing my experience and some projects I was able to complete so far as an undergrad. I have also attached my resume, which details my skills, experience, and education. I look forward to scheduling a time with you to discuss further how my knowledge of cybersecurity and yearning to learn more would benefit Argodillo University. You may contact me via phone or email at your convenience.
